

WAVE MAG

solution
exhibition
with magnetic connection

The best solution to attract attention

Wave Mag is the result of the fusion of two original concepts, recognized for their success in the world of display and retail: creativity of the **WAVE tubulars** and the modularity of the **TEXTILE FRAME** frames.

Wave Mag is composed of a set of frames made from tubes in aluminum and covered with fabric graphics. These frames can be easily connected to each other, thanks to the powerful magnets positioned within each structure, thus creating **configurations suitable for all communication spaces**: points of sale, fairs, shopping centers or offices.

Magnetic connection

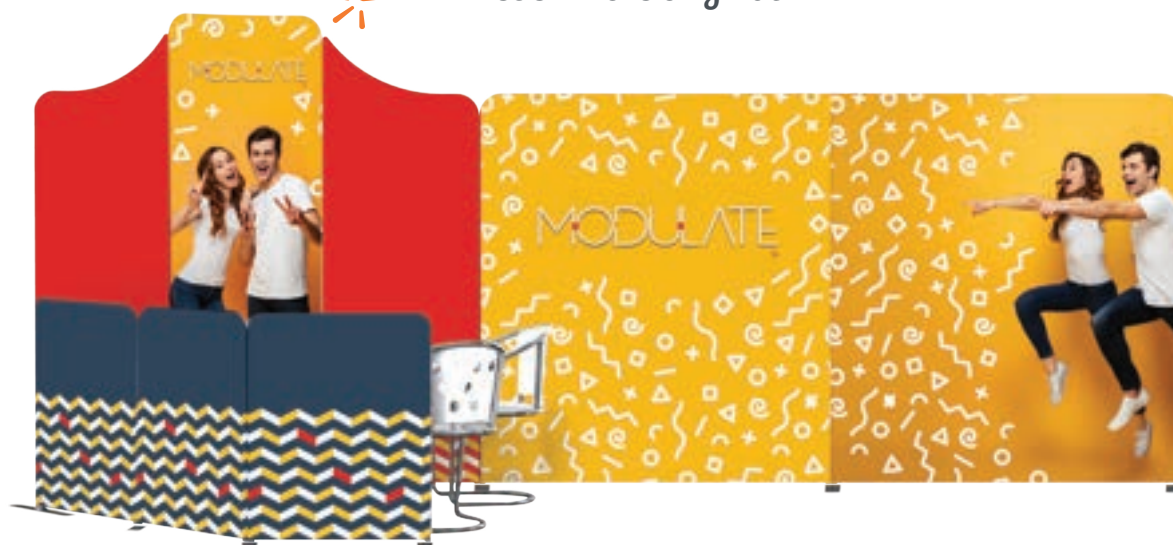

Mix and Match: assemble endlessly and without tools

Infinite configurations
100% Modular

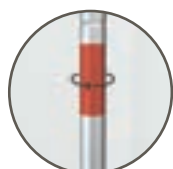

Change the height for solutions
even more original

Structures built from unique technological innovations

Each structure in the **Wave mag** range is made with aluminum tubing 30 mm in diameter which guarantee lightness and resistance.

This innovative line stands out for its integrated **MagLink** magnet system in each element and for the fixing system of the **Twist and Lock** bases

MagLink connector a 360° in each rod

System self-locking with tubular sections e snap button

Reinforcement tube central from the diameter of 18mm

Coating with fabric print front/back with zip closure

Possibility of customization with right angles

Extension from 400 mm optional for increase height of the structures

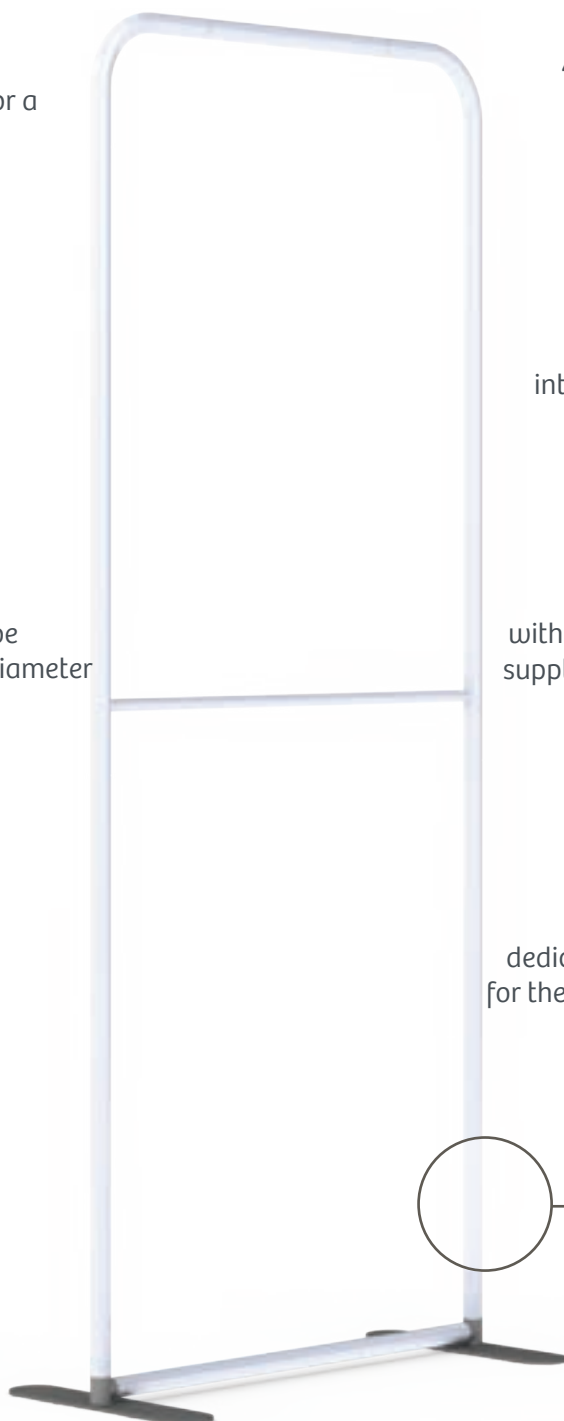

Labeling system intuitive numbered for facilitate assembly

Two support bases with twist & lock system supplied with each frame

Carrying bag Wave Mag with dedicated compartments for the basics and graphics

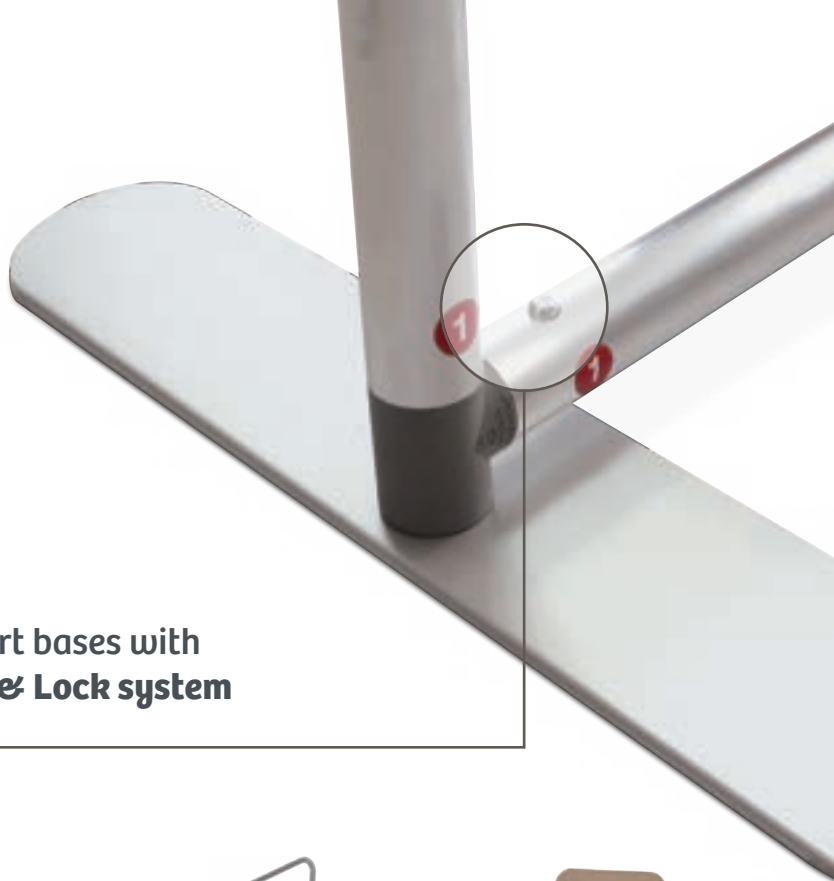

The Wave Mag structures are covered by one 5 year guarantee

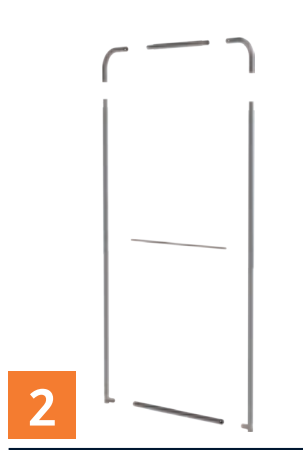

Intuitive assembly without the use of tools

Support bases with
Twist & Lock system

1
Assemble together i section tubulars with the **snap button**.

2
Add reinforcement central and connect the pipes using the system **numbered labeling**.

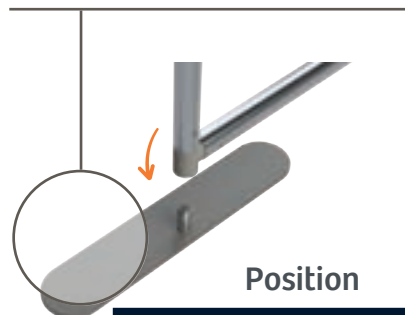

3
Place the bases **Twist & Lock** underneath structure and rotate them to lock them in place.

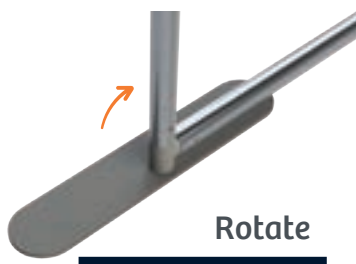

4
Use the gloves provided supplied with the **structure to install** the print on the frame.

1 struttura, 2 usi

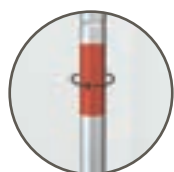

MagLink connector: simple, rapid and reconfigurable

Dai spazio alla tua originalità combinando le diverse dimensioni e forme delle cornici **Wave mag**.

Grazie all'esclusivo sistema magnetico **MagLink** integrato nella struttura, le cornici possono essere collegate tra di loro semplicemente avvicinandole.

 **PATENT
REGISTERED**

360° MagLink system: each structure includes 4 magnets that allow you to connect the frames together without the use of tools.

Why propose Wave Mag to your customers?

Unlimited modularity

Grazie al sistema di connessione magnetica, le cornici possono essere combinate e riconfigurate all'infinito, creando allestimenti versatili per qualsiasi spazio.

Reusable

Soluzione durevole e riutilizzabile per eventi e campagne diverse, riducendo i costi nel tempo.

Sustainable

The aluminum structures are completely recyclable guaranteeing a choice responsible and sustainable.

Quick and easy assembly

Niente attrezzi e niente stress: il sistema **TwisteLock** e l'etichettatura numerata rendono l'assemblaggio intuitivo e rapido

Wave Mag is the ideal solution for those looking for versatility, simplicity and impact quality visual

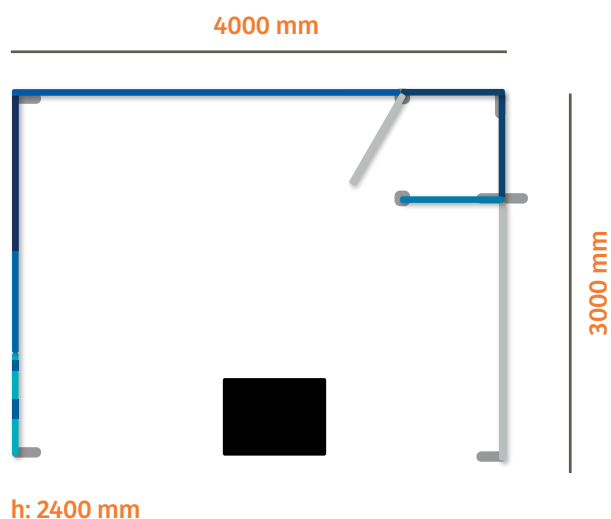

ZAMA

Reconfigurable stands

Wave mag frames can be used to make a complete stand of which you can **change the layout of the modules as many times as you want**, with the guarantee of an **excellent return on investment**.
