

1 • ASSEMBLE THE BASE

Insert the lamp tube and the four upright posts into the base.

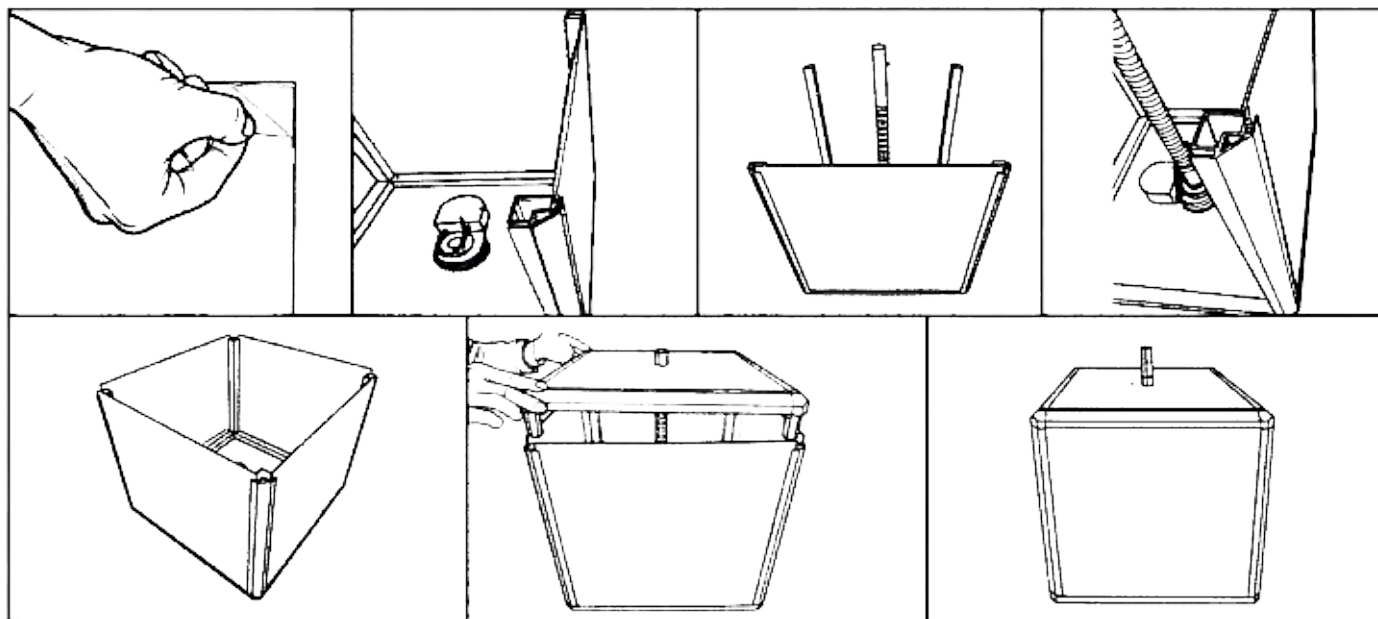

Hand-tighten the controller screws, then connect the black connectors together.

2 • INSTALL THE GRAPHIC PANELS

Remove the protective film from the plates and insert them around the light box.

Place the print between the opal and clear plates, then close with the top cover.

3 • STACK THE FOUR MODULES

Stack the four modules in sequence.

Rotate each snap fastener toward its notch until it locks securely into place.
