

Popup structure for very large banners. Anodized aluminum grid, it fans out taking shape in a single move.

It closes back just as easily; can be carried in its wheeled hard bag.

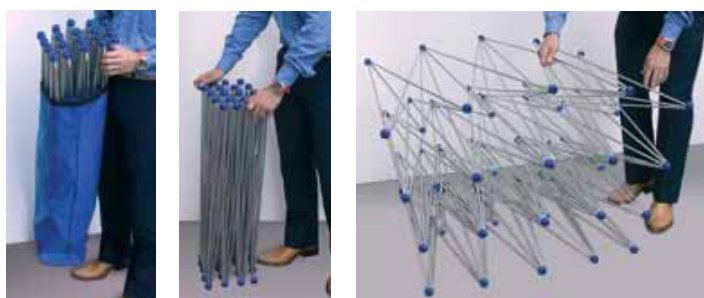

Ideal for setting up of fair booths, shop windows, stages for events....

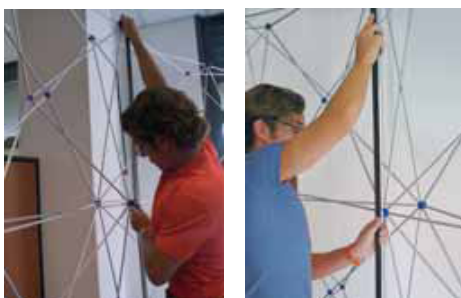

Assembly instructions

Take out parts from bag. We recommend rolling out graphic sheets on the floor for a few minutes in order to achieve better flatness.

Place aluminum structure on ground; grab a couple grey bars and pull them apart until display is fully opened.

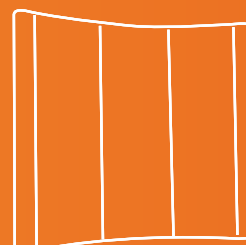

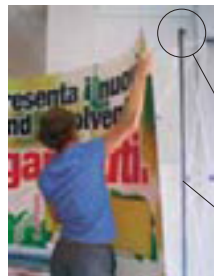

Vertically fix the magnetic bars to the sides of each module, including those at back of the two side canbers.

INSTRUCTIONS LEAFLET
WALL

Hang banner to hooks at top of structure and carefully lay it on the magnets (start from center panels and end with side edges).

hook

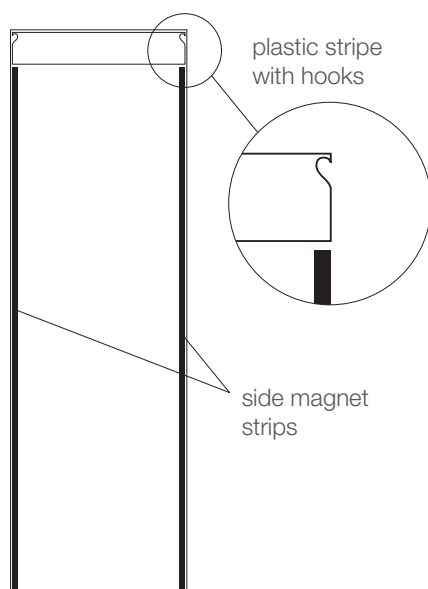

magnetic side stripes

Instructions for disassembly

Remove prints, spotlights and all magnetic bars from structure.

Grab one grey bar from front side and one from back side, at center of structure, and pull them apart until display is fully closed.

Instructions for banner

Prepare print on photo paper or similar (in stripes cm 222x66.9)

Apply prints on stop light barrier (GBC type) material

Laminate prints

Cut prints with utter care

Apply magnetic bands on backside (please note: magnet side with divider line must touch print!)

Apply the supplied plastic bands to back of print

Curve version

Module	n. of stripes	Stripe size
3x3	5	222 x 66,9
4x3	6	222 x 66,9
5x3	7	222 x 66,9
6x3	8	222 x 66,9

the number of stripes shown here includes the two side stripes.

WARNING: we recommend not placing main graphic elements in the side stripes.

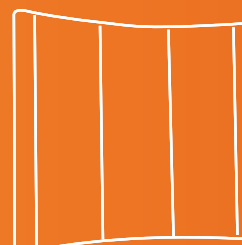

Stripe size for back side, if any: 222x80.9cm
